

## **State Supplemental Reporting Tax Information**

State supplemental reporting tax information data includes tax-exempt interest by state, direct federal obligation and indirect federal obligation treasury income breakdowns and foreign source income breakdowns. This information may be helpful while completing your tax return. This information is provided as a courtesy and is not required for any federal Form 1099 reporting by WFCS.

The timing of when state supplemental reporting tax information becomes available depends on each individual fund company. Consequently, state supplemental reporting tax information for mutual funds and Unit Investment Trusts (UITs) may not be available when all Original Consolidated Form 1099s are generated by mid-February.

In prior years, amended Form 1099s would not automatically be issued when this final information was received. Beginning in Tax Year 2024, all Consolidated Form 1099s with Treasury Money Market Fund holdings will be held back until the state supplemental reporting tax information data is received from the fund company.

If you believe there is state supplemental reporting tax information missing from your Form 1099, please contact your Financial Professional.

Additionally, you may contact the mutual fund issuer directly or review the issuer's website for a "supplemental tax guide" that will provide that information for what part of the fund's portfolio is invested in various state specific securities, or foreign country securities.

## Percentage of Income Earned by State and U.S. Territory

Most states do not impose income tax on interest income derived from their own municipal obligations or those issued by U.S. territories. For advice on your specific tax situation please consult a tax advisor, the IRS or your state tax authority.

The following table shows the percentage of income paid by a fund on a state-by-state basis. To calculate the amount of income attributable to a particular state or territory, multiply Form 1099-DIV box 12 total tax-exempt income received in 2024 from a particular fund by the appropriate percentage.

Below, is a sample of how this information is shown on the federal Form 1099 reported by WFCS.

In the below example, the Form 1099-DIV box 12 total is \$971.50.

## U.S. Government Obligations Information

In most states, fund dividends derived from U.S. government obligations are generally exempt from state income taxes. The percentage provided by the fund company is the portion of the dividend income paid by certain funds that qualifies for this exemption. To calculate the amount of income earned from U.S. government obligations, multiply the percentage by the ordinary dividends you received from the fund during the 2024 calendar year, reported in box 1a of Form 1099-DIV.

Below, is a sample of how this information is shown on the federal Form 1099 reported by WFCS.

Funds not shown would have had 0% dividend income derived from U.S. government obligations.
